The front wall

Cut the round gable window out for candy glass.

Mark the door with a toothpick. Do not cut it: you pipe the planks on.

The back wall on page 2 is the same shape with a light doorway instead.

Walls and roof

The side walls tuck between the front and back walls.

Dotted lines on the roof mark the overhang: walls sit inside them. Pipe the peach shingles while the panels lie flat, starting at the eave edge.

Roof pitch 48 degrees.
