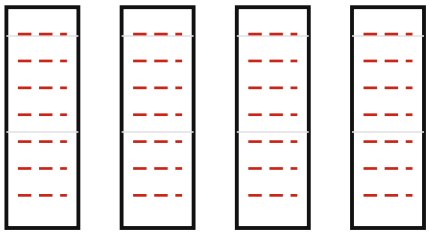
Finished small house

About 4 5/8 in wide and 5 in deep at the walls, about 5 1/4 in tall to the ridge.

About 101 square inches of dough: under half of one batch, rolled 1/4 inch thick.

Use a board at least 10 x 9 in so the house and the trees fit.

Shutters, cut 4 (one each side of the two front windows)



Each shutter glues flat to the front wall touching its window frame. The slat lines are a piping guide only. Bake the shutters on their own small pan, since they finish sooner. Door and windows are piped on, never cut out.
