Camper Gingerbread House Template

Print at Actual Size or 100%, never Fit to Page. Dough rolled 1/4 inch thick. bestgingerbreadhouses.com

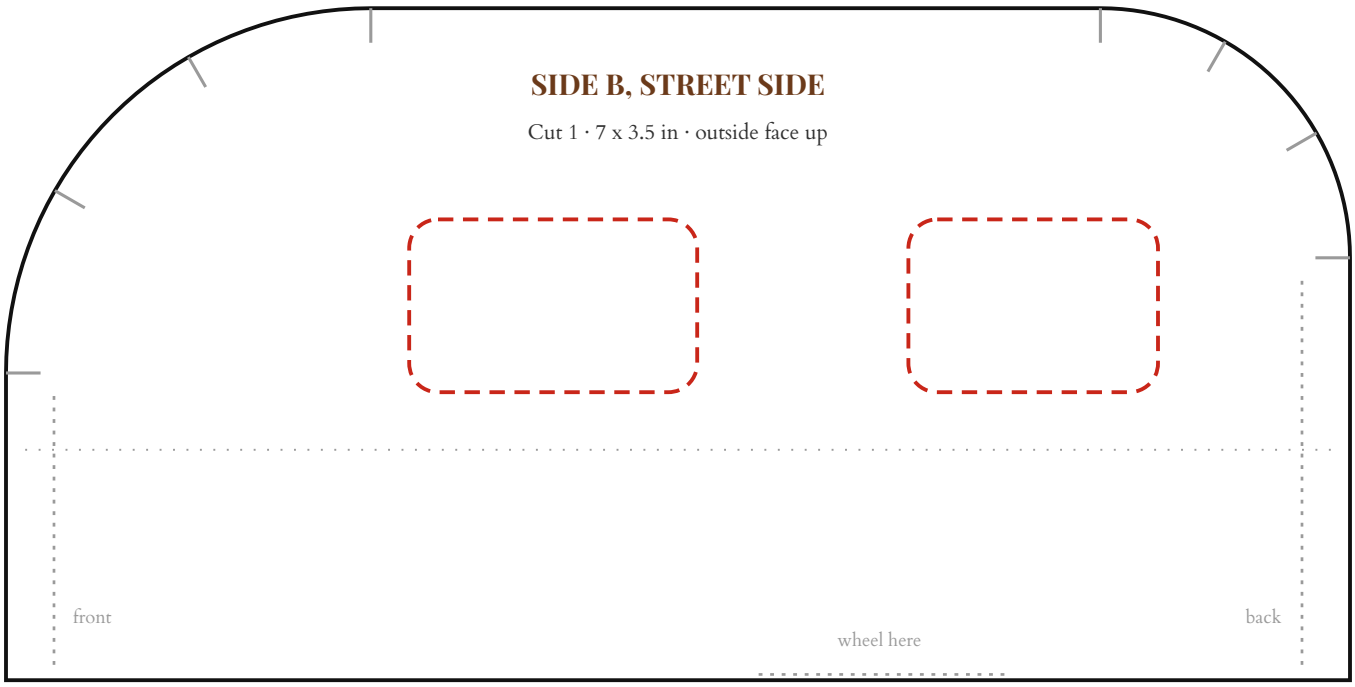

SIDE A, DOOR SIDE

Cut 1 · 7 x 3.5 in · outside face up

SIDE B, STREET SIDE

Cut 1 · 7 x 3.5 in · outside face up

The curve is in the sides. Grey ticks on each curve show where the strip edges land.
Side B is the mirror of side A, so the windows face out on both.

back

front

FLOOR

Cut 1 · 7 x 4 in

dotted: the sides stand on the long edges, the walls at the ends

underneath: the two rails run 0.35 in in from each long edge

BACK WALL · cut 1 · 3.5 x 2.2 in

top edge: back curve strip 1 sits here

FRONT WALL · cut 1 · 3.5 x 1.6 in

faint dots: the two-tone paint line

CHASSIS RAILS · cut 2 · 6.5 x 0.5 in · stand on edge under the floor

ROOF TOP

Cut 1 · 3.8 x 3.5 in

the long edges run front to back

CURVE STRIPS · cut 3 of each

back curve strip · 3.5 x 0.673 in

back curve strip · 3.5 x 0.673 in

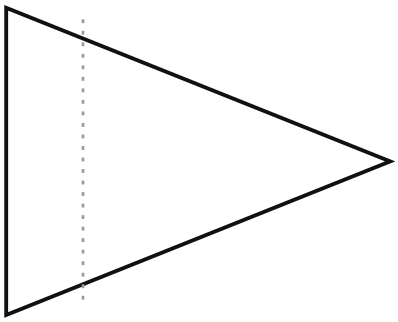

back curve strip · 3.5 x 0.673 in

front curve strip · 3.5 x 0.984 in

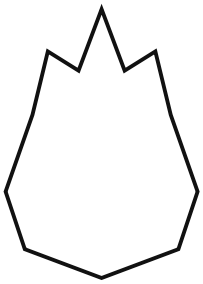

front curve strip · 3.5 x 0.984 in

front curve strip · 3.5 x 0.984 in

TONGUE · cut 1 · 1.6 x 2 in

lies flat on the board; dotted end tucks under the floor

FLAME · cut 1 · 1 x 1.4 in

Strips go on in order: the three front strips up from the front wall, the three back strips up from the back wall, then the roof top drops in last. Each strip edge lines up with a grey tick on the side panels.
Bake the narrow strips together on one tray; they finish before the big panels.

WHEELS · cut 2 · 1.3 in round

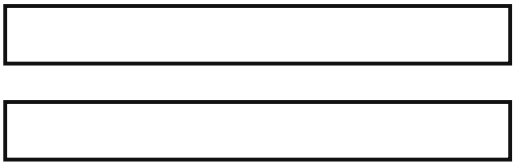

dotted: hubcap circle to ice

AWNING · cut 1 · 2.3 x 1.1 in

dotted: stripe lines; a long edge glues to the awning line

POSTS

cut 2 · 2.63 x 0.3

Build order

1. Bake. Fill the 6 window openings with crushed hard candy near the end of the bake. Flood the paint while the pieces lie flat.
2. Two rails on edge on the board, the floor on top. Wait 2 hours.
3. Back wall and front wall on the floor ends, then side A and side B against them. Prop. Wait 2 hours.
4. LED tea light on the floor. Front curve strips up from the front wall, back strips up from the back wall.
5. Roof top in last. Pipe every outside seam. Wait 2 hours.
6. Wheels on the side faces, tongue under the front, awning on its line with a post under each outer corner.
7. Campsite: stone ring, pretzel logs, the flame in a mound of icing. Candy after 4 hours. Move it the next day.

Finished camper: about 7 in long (8.6 in with the tongue), 4 in wide and 4.25 in tall.
It needs a board at least 12 by 11 in with the campsite beside it. All 21 pieces fit one batch of our house dough.
Battery lights only. The campfire is candy: never a real flame near a gingerbread camper.
