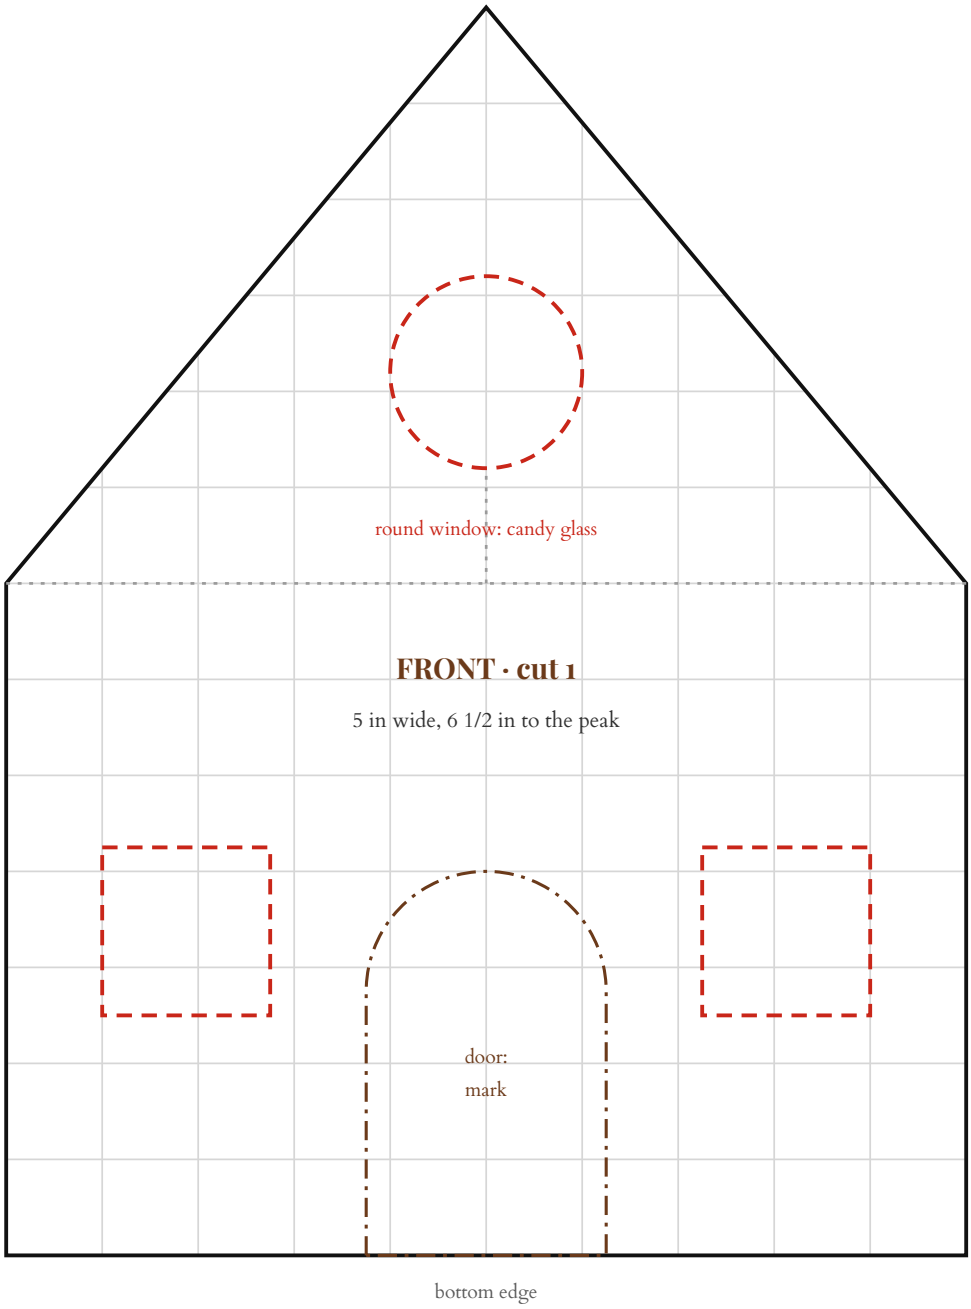
Zelda Gingerbread House Template

Print at Actual Size or 100%, never Fit to Page. Pieces are for dough rolled 1/4 inch thick. Grey grid = 1/2 inch guide. bestgingerbreadhouses.com



The front wall

Cut out the round gable window and the two small square windows.

Do not cut the door: mark it with a toothpick and flood it as wood planks.

Dotted lines show where the dark timber beams go.

bottom edge, faces away from the room

The back wall

The light doorway is 2 in wide, so a battery tea light slides in from behind and lights the round window and all six square ones.

Battery lights only: never a real candle inside.

bottom edge · tucks between the front and back walls

Sides and chimney

The side walls are as tall as the eave, so the roof rests on their top edge.

Cut out two square windows in each side wall.

cut 1

The chimney

The slanted bottom matches the roof. The short front piece faces the ridge and the tall back piece faces the eave. Flood it white before you build it.

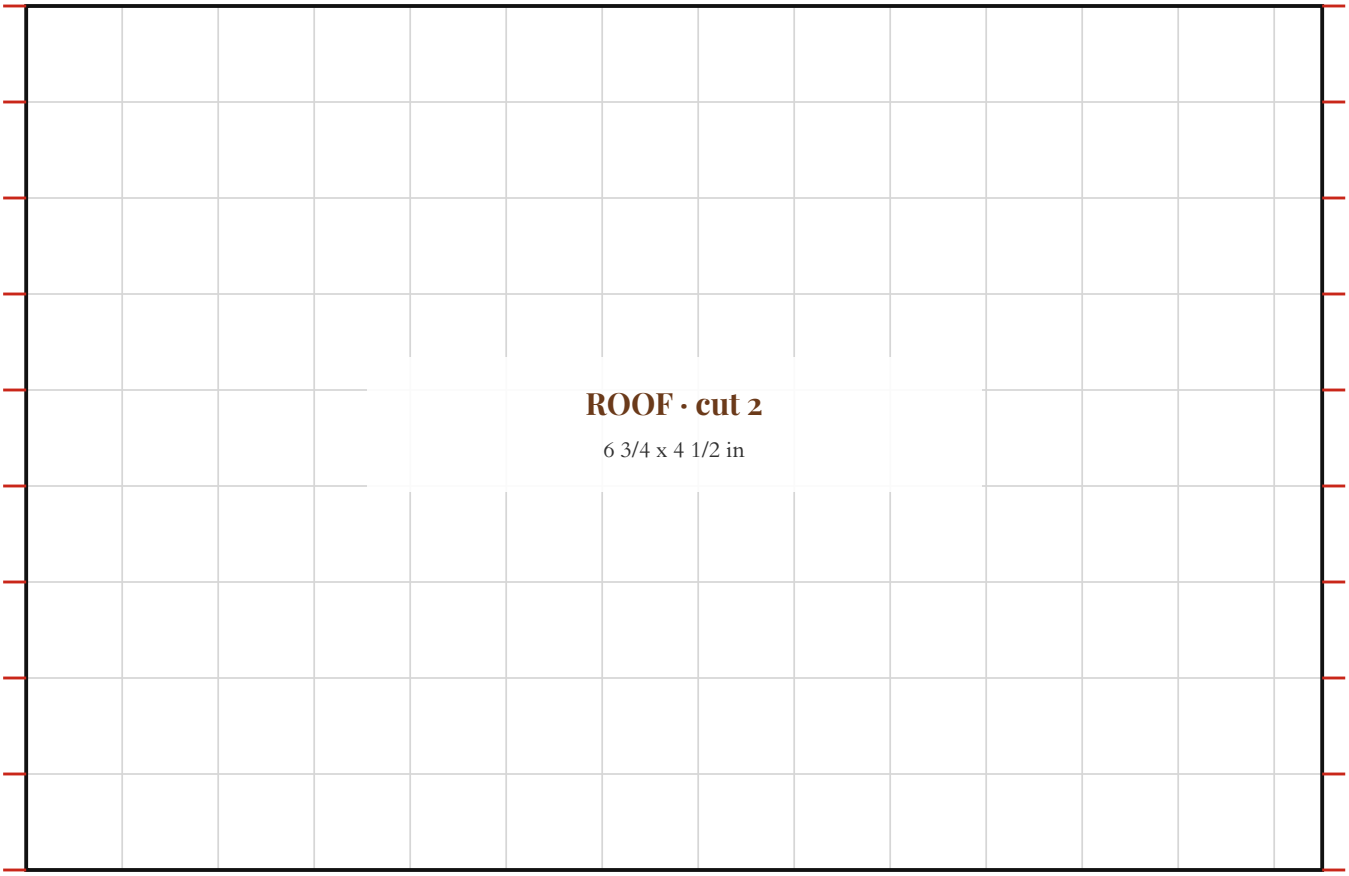
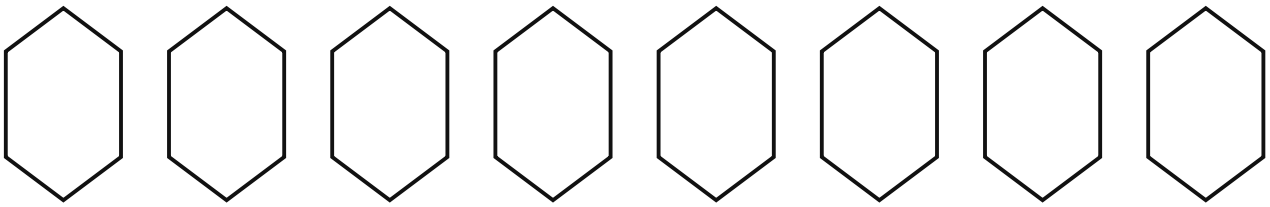
ridge edge



eave edge: red ticks every 1/2 in mark the shingle rows, piped from the eave up

RUPEE STEPPING STONES · cut 8



Cut from re-rolled scraps. Flood them green, blue and red after baking.

The roof

The roof panels rest on the sloped edges of the front and back walls and overhang each end by 3/8 in. Pipe the terracotta shingles flat, before they go up.
