Charcuterie Gingerbread House Template

Print at Actual Size or 100%, never Fit to Page. Pieces are for cracker dough rolled 1/8 inch thick. bestgingerbreadhouses.com

SIDE WALL · cut 2

4 1/4 x 3 1/2 in

FRONT

two pretzel windows: mark only

bottom edge, stands on the board · tucks between the front and back walls

Cut

Mark only, no cut

Guide, no cut

Windows: press a square pretzel snap on with a dab of cream cheese. Nothing is cut out of this house.

ridge edge: the last row of salami folds over here

ROOF · cut 2

5 x 3 3/5 in. Shingle with salami.

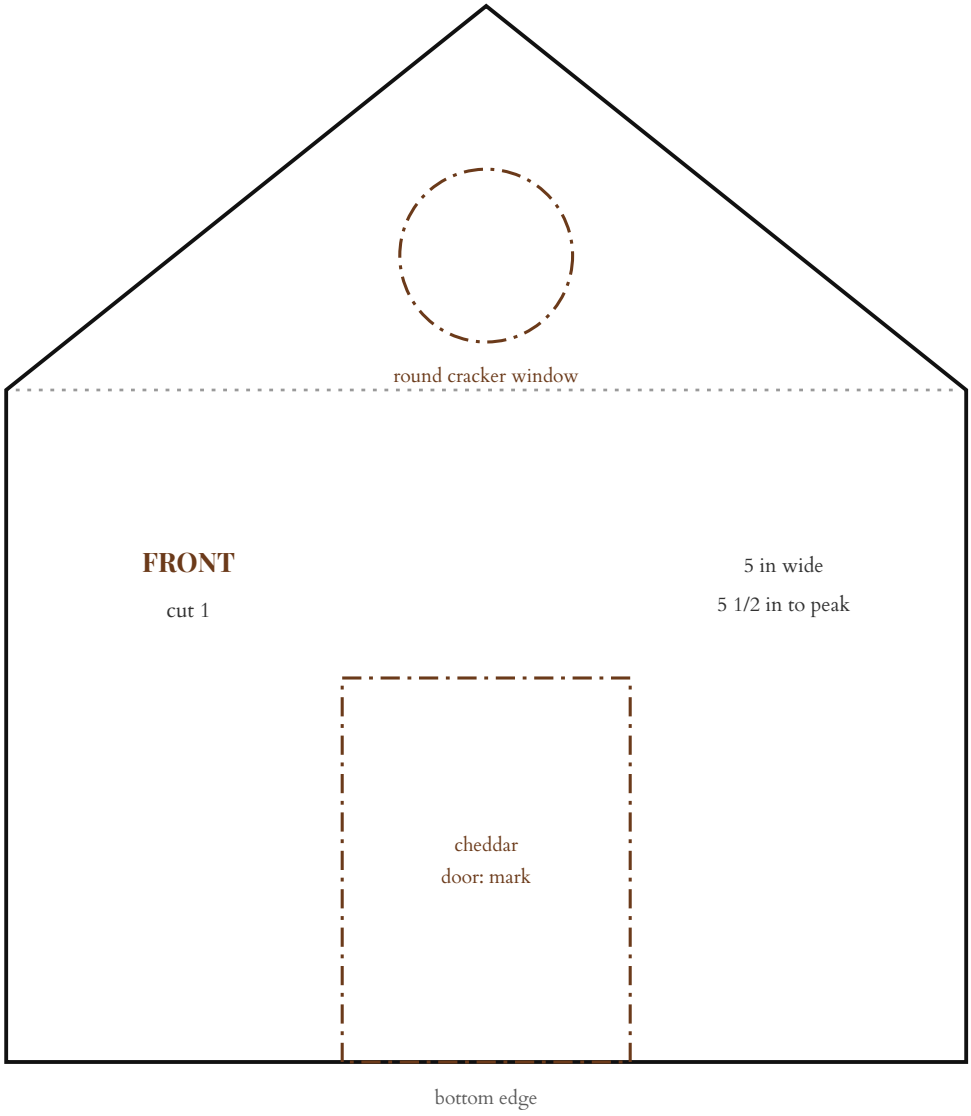

grey line: wall top. Below it is the eave

1 inch test bar: measure it first

The front wall

Nothing is cut out. Score the door and the round window lightly with a toothpick before baking so you know where the cheese and cracker go.

The side walls tuck behind the front and back walls, so the house is 5 in wide and 4 1/2 in deep.

Cut

Mark only, no cut

Guide, no cut

Piece list: 6 pieces from 1 batch of rye cracker dough

Front wall	1	5 wide, 5 1/2 to the peak
Back wall	1	5 wide, 5 1/2 to the peak
Side wall	2	4 1/4 x 3 1/2
Roof	2	5 x 3 3/5

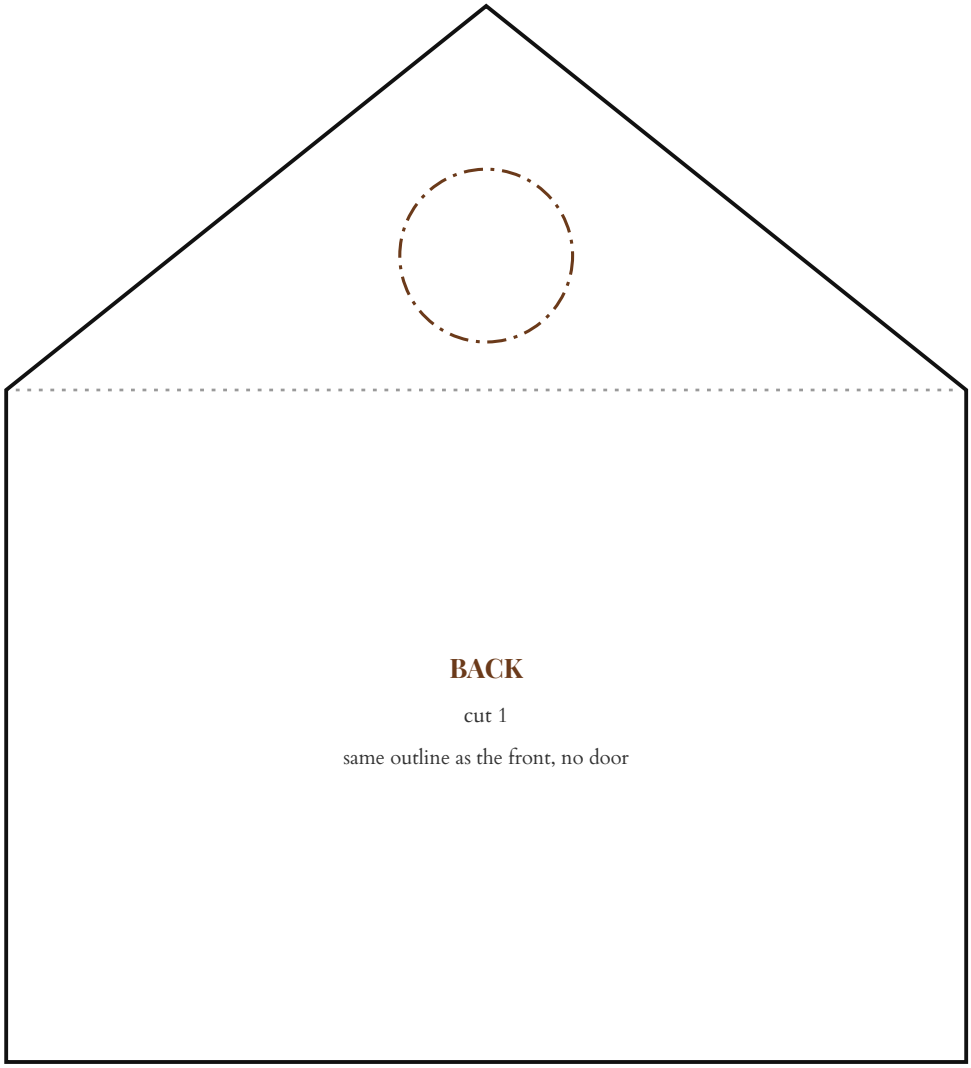

Sizes in inches. Not baked: salami, cheddar, pretzels, parmesan, rosemary, almonds.

BACK

cut 1

same outline as the front, no door

bottom edge

The back wall

Same outline as the front, with only the round window. Guests reach the house from every side, so dress the back with a salami rosette or a sage wreath.

Nothing goes inside this house: it is eaten, so no lights and no candles.

Cut

Mark only, no cut

Bigger house? Print at 125% or 150%.

At 125% the test bar measures 1 1/4 in and the house stands about 7 in tall. At 150% it measures 1 1/2 in and the house stands about 8 1/4 in. The 150% pieces need a second sheet of paper for the roof. Use the Shingle Calculator on the page for the salami count at each size.
