Fire Station Gingerbread House Template: page 1 of 5

14 pieces over 5 pages. Check the red bar on every page before you cut.

What is on each page

Page 2 Front wall, cut 1: 6 x 6 in with the parapet; 11 candy windows

Page 3 Side walls, cut 1 left and 1 right: 3.5 x 4.5 in

Page 4 Back wall, cut 1: 6 x 4.5 in; flat roof, cut 1: 6 x 3.75 in

Page 5 Hose tower front and back, 1.8 x 7.5 in; tower sides, cut 2, 1.3 x 7.5 in

Page 1 Tower cap, 1.8 in square; tower roof faces, cut 4: 1.8 in base, 1.66 in tall

Finished fire station

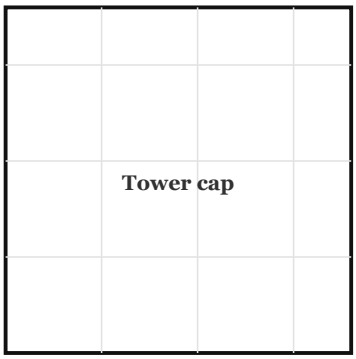

About 7.8 in wide with the tower, 4 in deep, about 9 1/4 in to the tower tip.

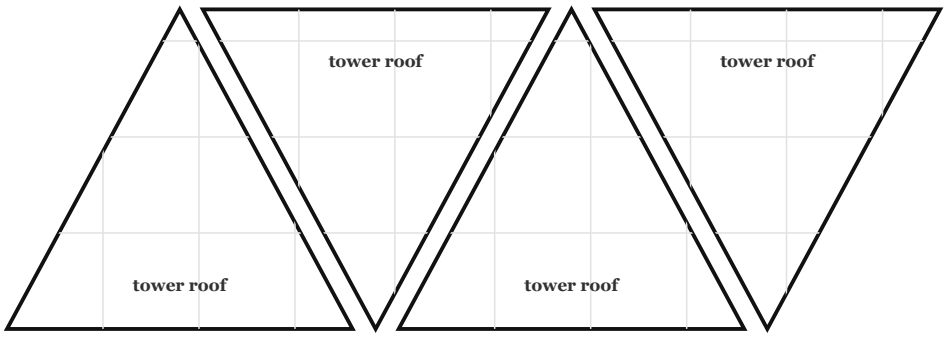

16 candy glass windows: 8 small panes in the bay doors, 5 upstairs, 1 on the left, 2 in the tower.

The bay doors are piped, not cut. The tower stands on the board, against the left wall.

About 170 square inches of dough: one batch, rolled 1/4 inch thick.

Use a board at least 10 x 12 in, so fire truck cookies can park out front.

Tower roof faces, cut 4: drawn each way up to save dough

1 inch test bar
measure it first

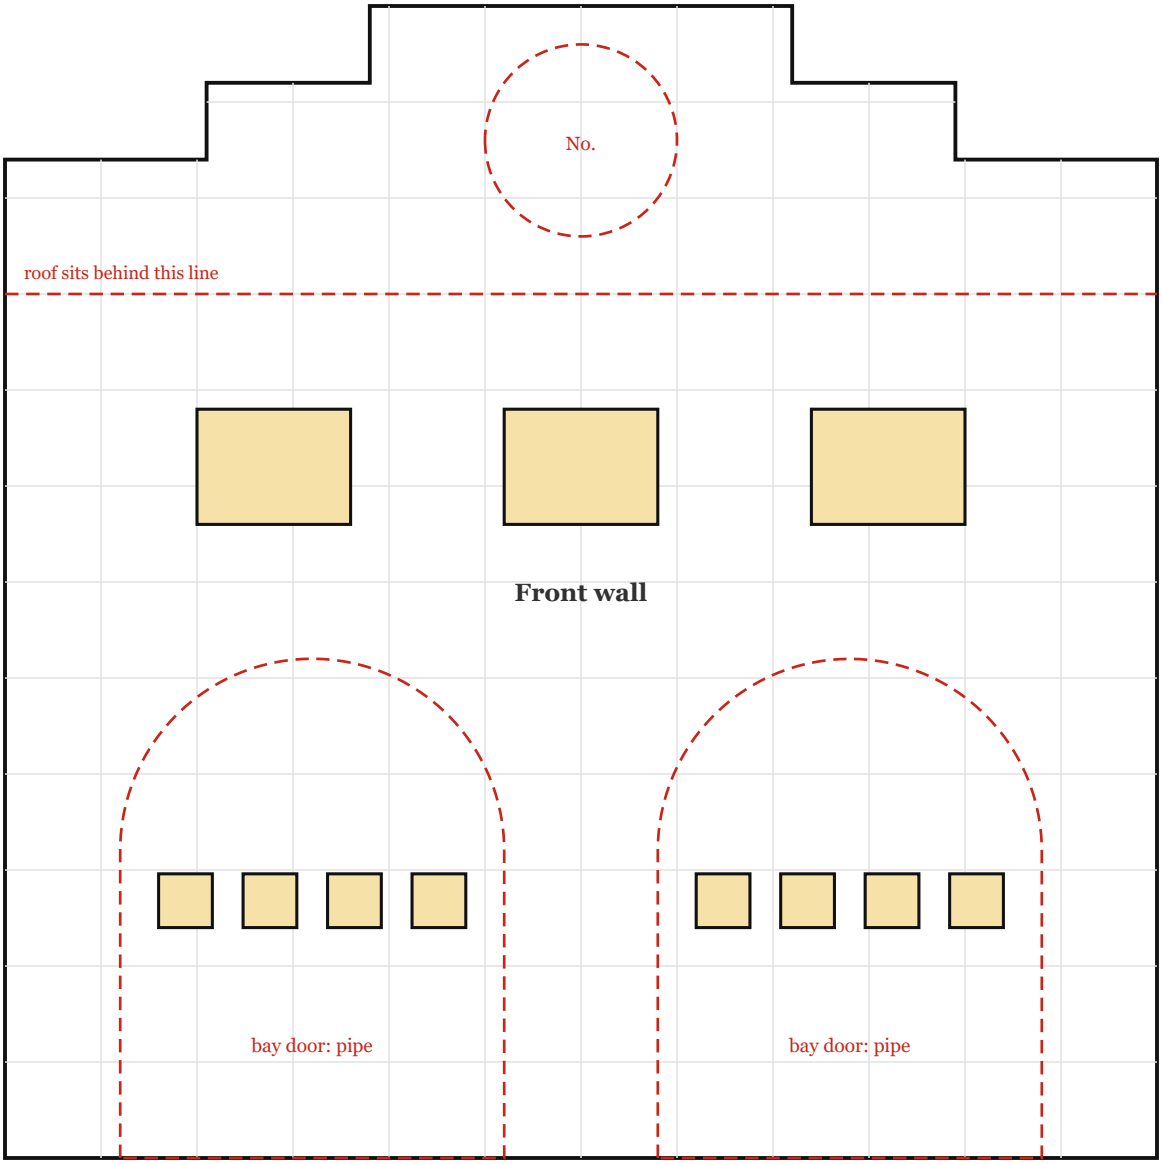

Solid line: cut. Gold window: cut out, then fill with crushed hard candy near the end of the bake.

Dashed black arch: cut out and leave open. Red dashes: pipe or guide only, do not cut.

measure it first

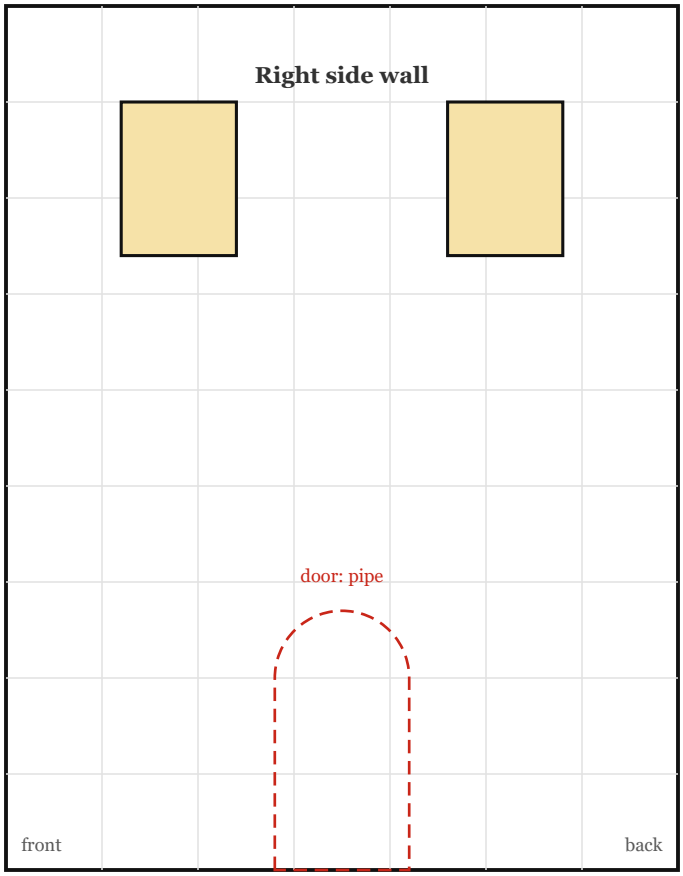

The bay doors stay solid dough: piping them keeps the wall strong enough to carry the parapet and the roof edge.

Solid line: cut. Gold window: cut out, then fill with crushed hard candy near the end of the bake.
Dashed black arch: cut out and leave open. Red dashes: pipe or guide only, do not cut.

Fire Station Gingerbread House Template: page 3 of 5

Side walls, 1 left and 1 right. They fit between the front and back walls.

1 inch test bar
measure it first

The red box on the left wall shows where the hose tower stands.

Keep it bare of piping so the tower icing grips the dough.

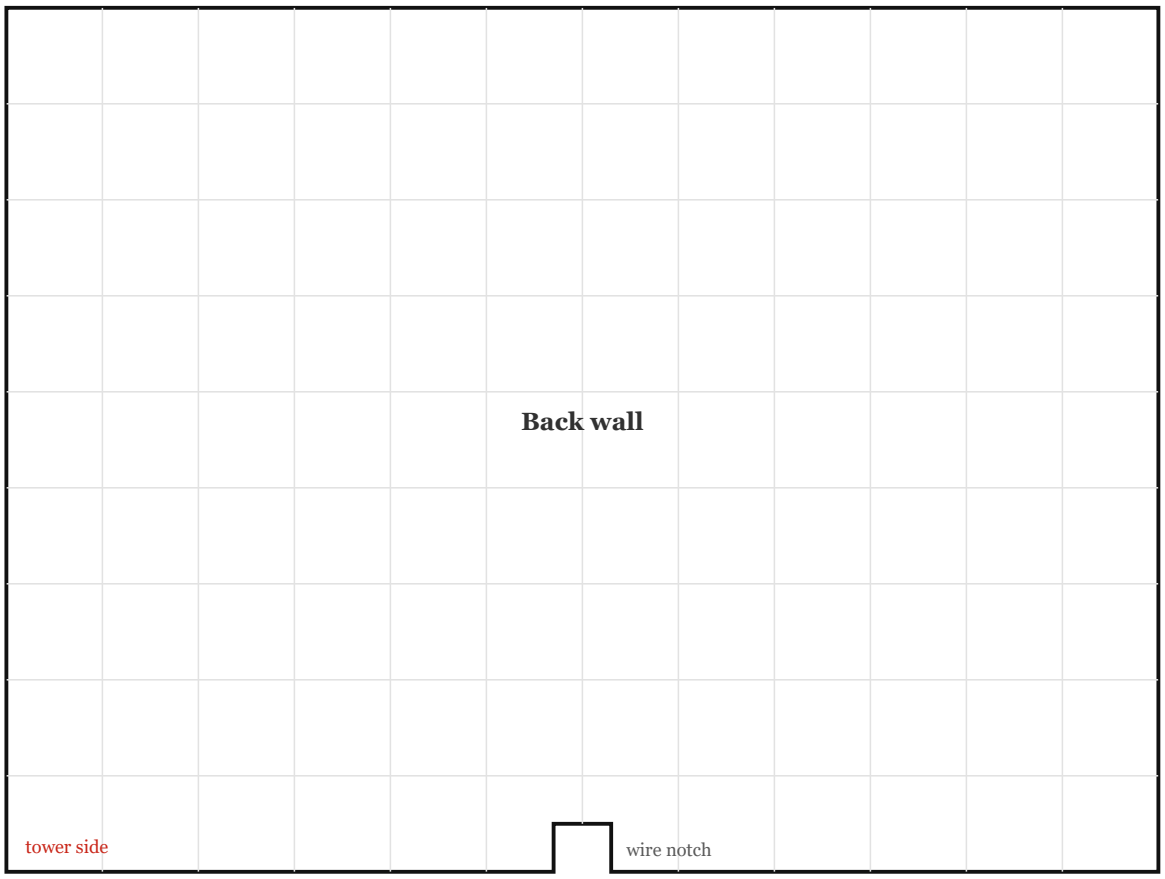

Solid line: cut. Gold window: cut out, then fill with crushed hard candy near the end of the bake.

Dashed black arch: cut out and leave open. Red dashes: pipe or guide only, do not cut.

Fire Station Gingerbread House Template: page 5 of 5

Hose tower walls. Front and back are 1.8 in wide; the sides fit between them.

1 inch test bar
measure it first

Cut the two slit windows and the three hose arches. The door is piped, not cut, so the bottom of the tower stays strong enough to carry the cap and roof.

Solid line: cut. Gold window: cut out, then fill with crushed hard candy near the end of the bake.
Dashed black arch: cut out and leave open. Red dashes: pipe or guide only, do not cut.
