The square walls

Each floor is a box of two square walls and two narrower side walls on page 2.

Cut out the doorway, both light doorways and the window. The window gets candy glass.

Dotted lines are plank guides and the grey dots are nail heads: pipe them in icing.

Piece list: 1 batch of dough

Ground front	1	3 x 3, page 1
Back wall	2	3 x 3, page 1
Upper front	1	3 x 3, page 1
Window side	2	2.5 x 3, page 2
Plain side	2	2.5 x 3, page 2
Floor plate, roof deck	2	3.5 square, page 2
Roof triangle	4	3.5 base, 2.85 tall, page 3
Ramp, brace	1 each	page 3
Chest side, end, lid plank	2, 2, 3	page 3

The side walls

These tuck between the front and back, so each floor comes out 3 in square.

Window sides go on the ground floor, plain sides upstairs.

The plates

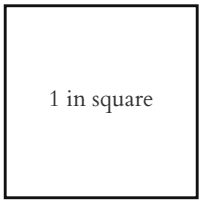

One plate sits on the ground floor and carries the upper floor. The other is the roof deck the cone roof is built on.

Each overhangs the walls by 0.25 in all round. The dotted square shows where the walls land: that is where you pipe the glue.

The roof and the ramp

Four triangles lean together into a steep cone roof on the roof deck. Build three around a ball of foil, slide the foil out, then add the fourth.

The ramp leans on a ground floor side wall at 45 degrees, its top edge tucked under the floor plate. The brace stands upright under it. Dotted lines on the triangle and ramp are guides for piped planks and steps.
