The engine body

The cab sits on the back of the deck, sides outside the front and back walls. The dotted lines on the deck show where the two cradle strips lie to hold the boiler.

The boiler, wheels, stack, strips and plate are on page 2.

Engine parts and coal car

Ten boiler discs stack into the round boiler: cut them with a 1 1/2 inch round cutter or a glass, or trace the circle.

The front plate closes the front of the engine rails.

Car wheels: cut 4 per car, 12 for all three cars.

The boxcar

Mark the door with a toothpick. Do not cut it.

The flat roof reaches 1/4 inch past every wall.

Grey circles on the rails show where the wheels go.

Skip the boxcar for a shorter, quicker train.

The caboose

The cupola is a small box that sits on the caboose roof.
Its ends tuck between its sides, like every car body.
Mark the end doors with a toothpick. Do not cut them.
Couple the cars with pretzel sticks laid across the gaps.
