# Schoolhouse Gingerbread House Template: page 1 of 3

16 baked pieces over 3 pages. Check the red bar on every page first.

## What is on each page

**Page 1** Front gable wall (double door, gable window) and back gable wall (two windows)

**Page 2** Side walls, cut 2: 4.6 x 2.2 in each, three windows

**Page 3** Roof slabs, cut 2: 5.2 x 2.3 in, and the bell tower: platform, 4 arched faces, 4 cap triangles

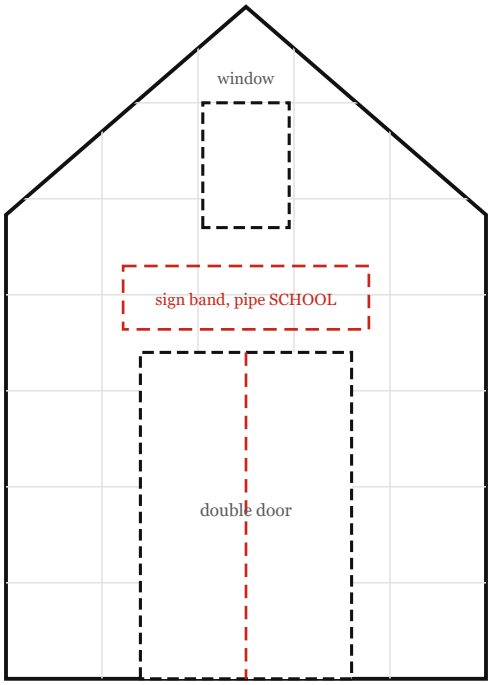

## Finished schoolhouse

About 4 5/8 in long, 3 in deep, 2 1/4 in to the eaves and 5 3/8 in tall to the tip of the bell tower.

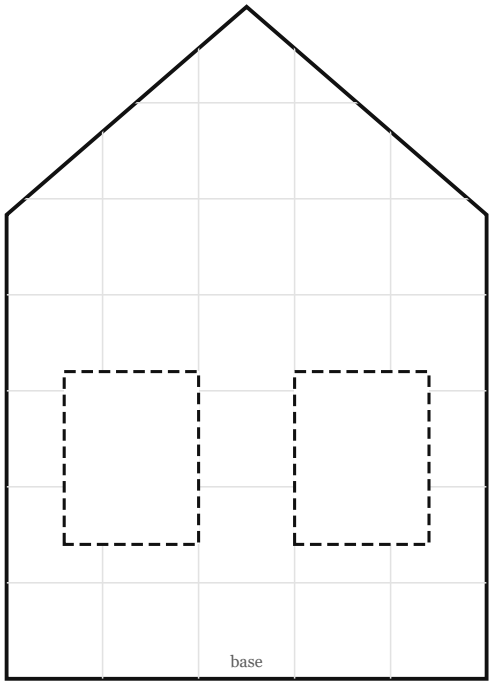

About 65 square inches of dough: well under one batch, rolled 1/4 inch thick, with plenty for spares.

Use a board at least 10 x 8 in so the flagpole and a yard of snow fit in front.

**Front gable wall, outside face**

**Back gable wall, outside face**

1 inch test bar
measure it first

The gable walls fit BETWEEN the long side walls, so the house is 3 in deep outside. Cut the dashed openings out before baking, then bake the door piece beside the wall and glue it back in. Pipe a red sign band over the door and the word SCHOOL in white. The red centre line is where the two door leaves meet. Pretzel rods in the yard make the flagpole.

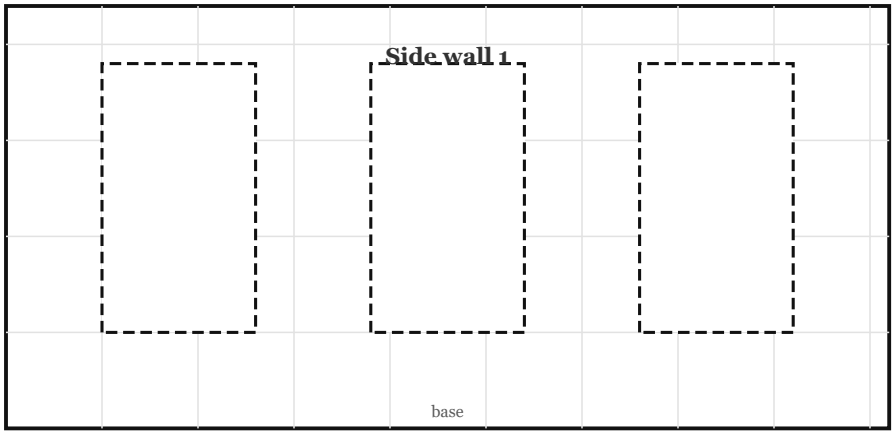

Solid line: cut. Dashed black shape: cut out before baking (bake the door piece and glue it back).

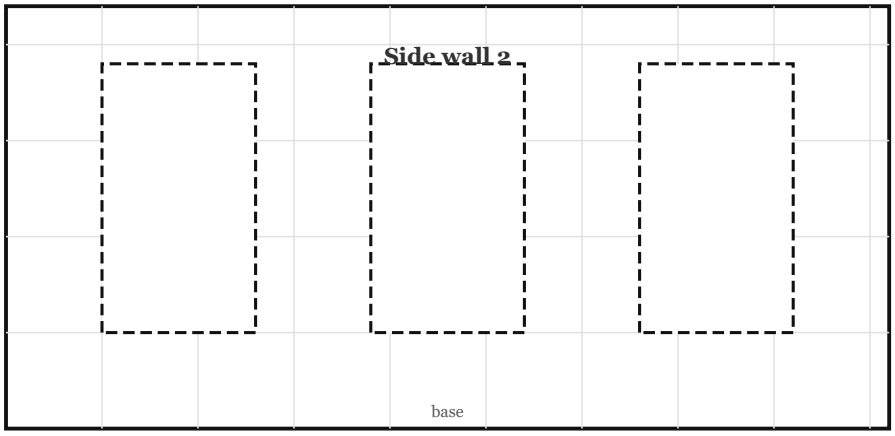

Red dashes: guide only, do not cut.

measure it first

Cut on the parchment and slide the paper onto the pan. Pipe the white window frames and the cross bars flat before standing the walls up.

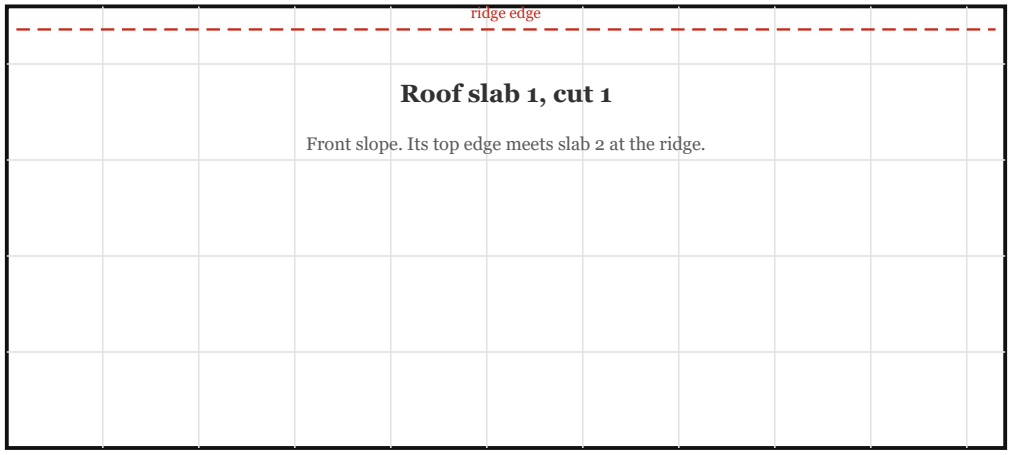

Solid line: cut. Dashed black shape: cut out before baking (bake the door piece and glue it back).

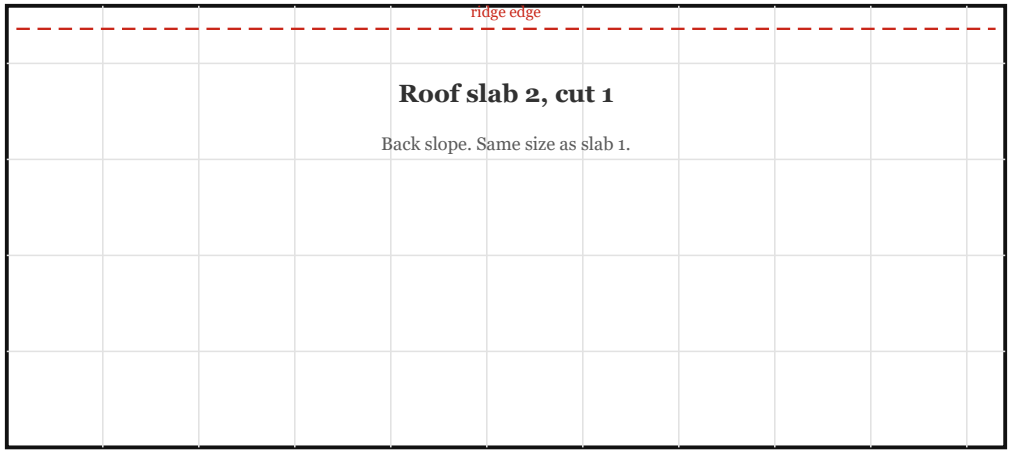

Red dashes: guide only, do not cut.

# Schoolhouse Gingerbread House Template: page 3 of 3

Two roof slabs and the bell tower. The roof slopes about 41 degrees.

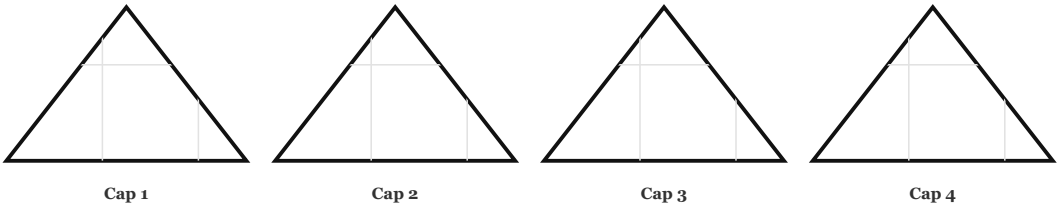

**Bell tower: platform and 4 identical arched faces**

**Bell tower cap, cut 4 triangles**

measure it first

The platform sits across the ridge. Bridge the gaps under its edges with icing and snow. Stand the four tower faces on it in a square and glue their edges together, then lean the four cap triangles together at the top.

Solid line: cut. Dashed black shape: cut out before baking (bake the door piece and glue it back).

Red dashes: guide only, do not cut.
