Windmill Gingerbread House Template: page 1 of 5

20 pieces over 5 pages. Check the red bar on every page before you cut.

What is on each page

Page 2 Tower faces 1 to 3: 2.11 in at the base, 1.11 in at the top, 6.06 in tall

Page 3 Tower faces 4 to 6. Print pages 2 and 3 twice: the 2nd copy on cardstock is the inside former

Page 4 Sail blades, cut 4 (cut a 5th as a spare): 1.20 x 5.34 in

Page 5 Stage ring, 2 cap gables, 2 cap roof panels

Page 1 Top plate, 3 back hub discs 1 in, 1 front hub disc 1.3 in

Finished windmill

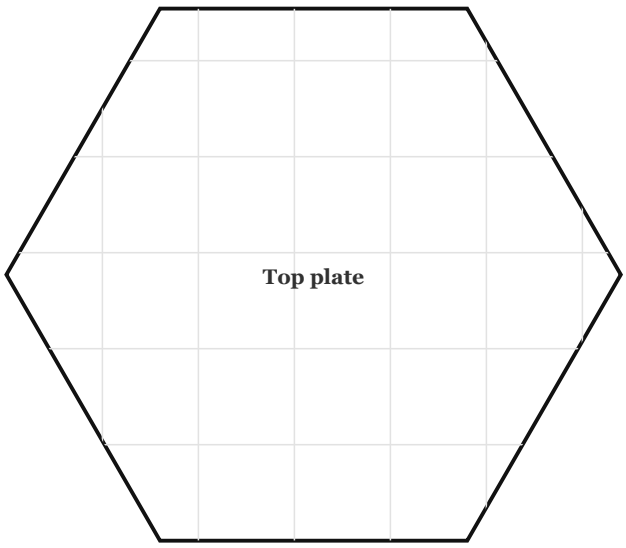

About 11 in tall to the top sail tip, about 11 in across the sails, a 4.8 in wide tower base.

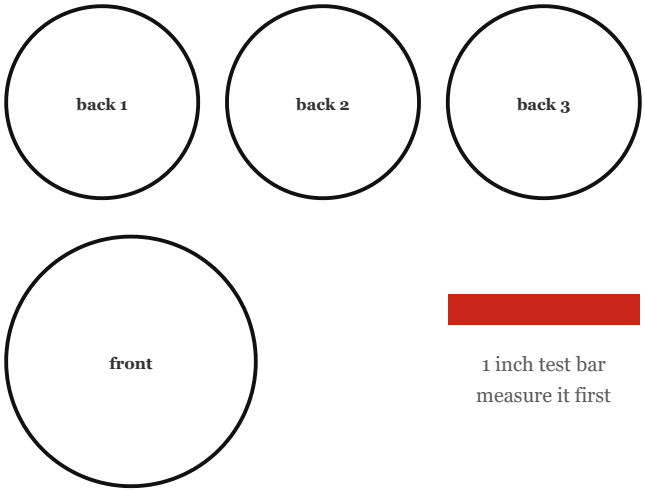

A six-sided tower that leans in about 8 degrees, with 6 candy glass windows and a piped door.

The bottom sail stands on the board, so the board carries the sails, not the tower.

About 109 square inches of dough: one batch, rolled 1/4 inch thick, with room for spares.

Use a board at least 14 x 12 in.

measure it first

Hub discs: the 3 back discs stack on the tower; the sails sit between them and the front disc.

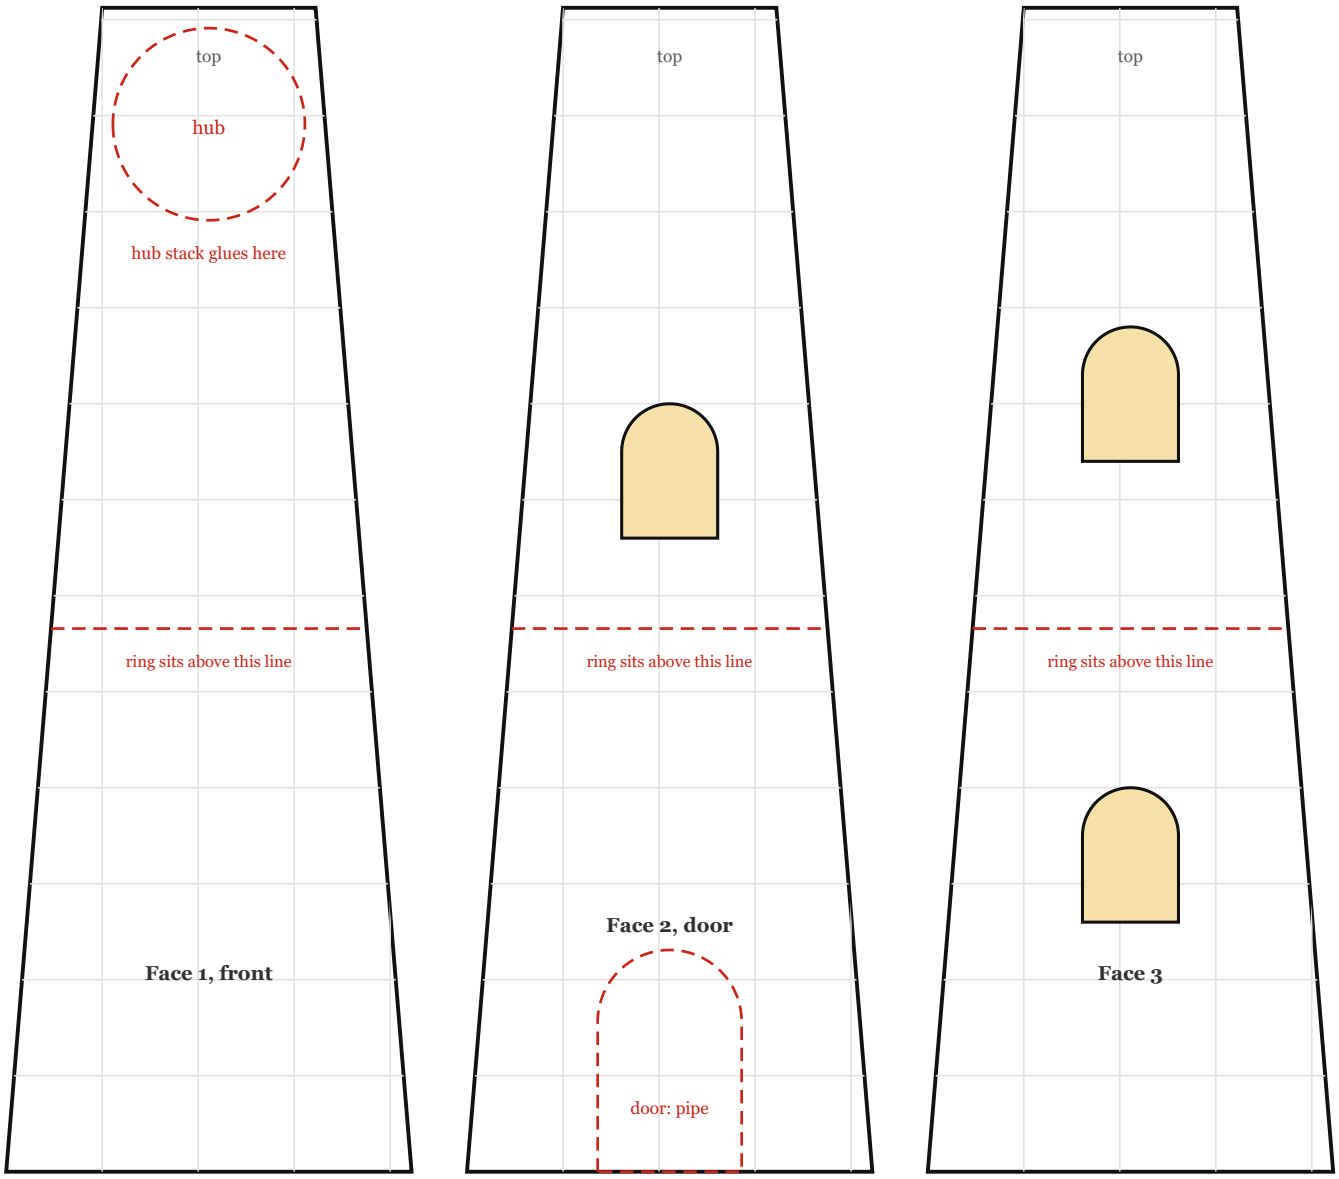

Solid line: cut. Gold window: cut out, then fill with crushed hard candy near the end of the bake.

Red dashes: guide only, do not cut (pipe the door and sail lattice along them).

Print at Actual Size or 100 percent, never Fit to Page. bestgingerbreadhouses.com

Windmill Gingerbread House Template: page 2 of 5

Tower faces 1 to 3. Wide end down. Face 1 carries the sails, face 2 the piped door.

measure it first

Former: print this page again on cardstock, cut just inside the lines, tape the six card faces edge to edge into a tapered tube. The dough faces lean on it while they set.

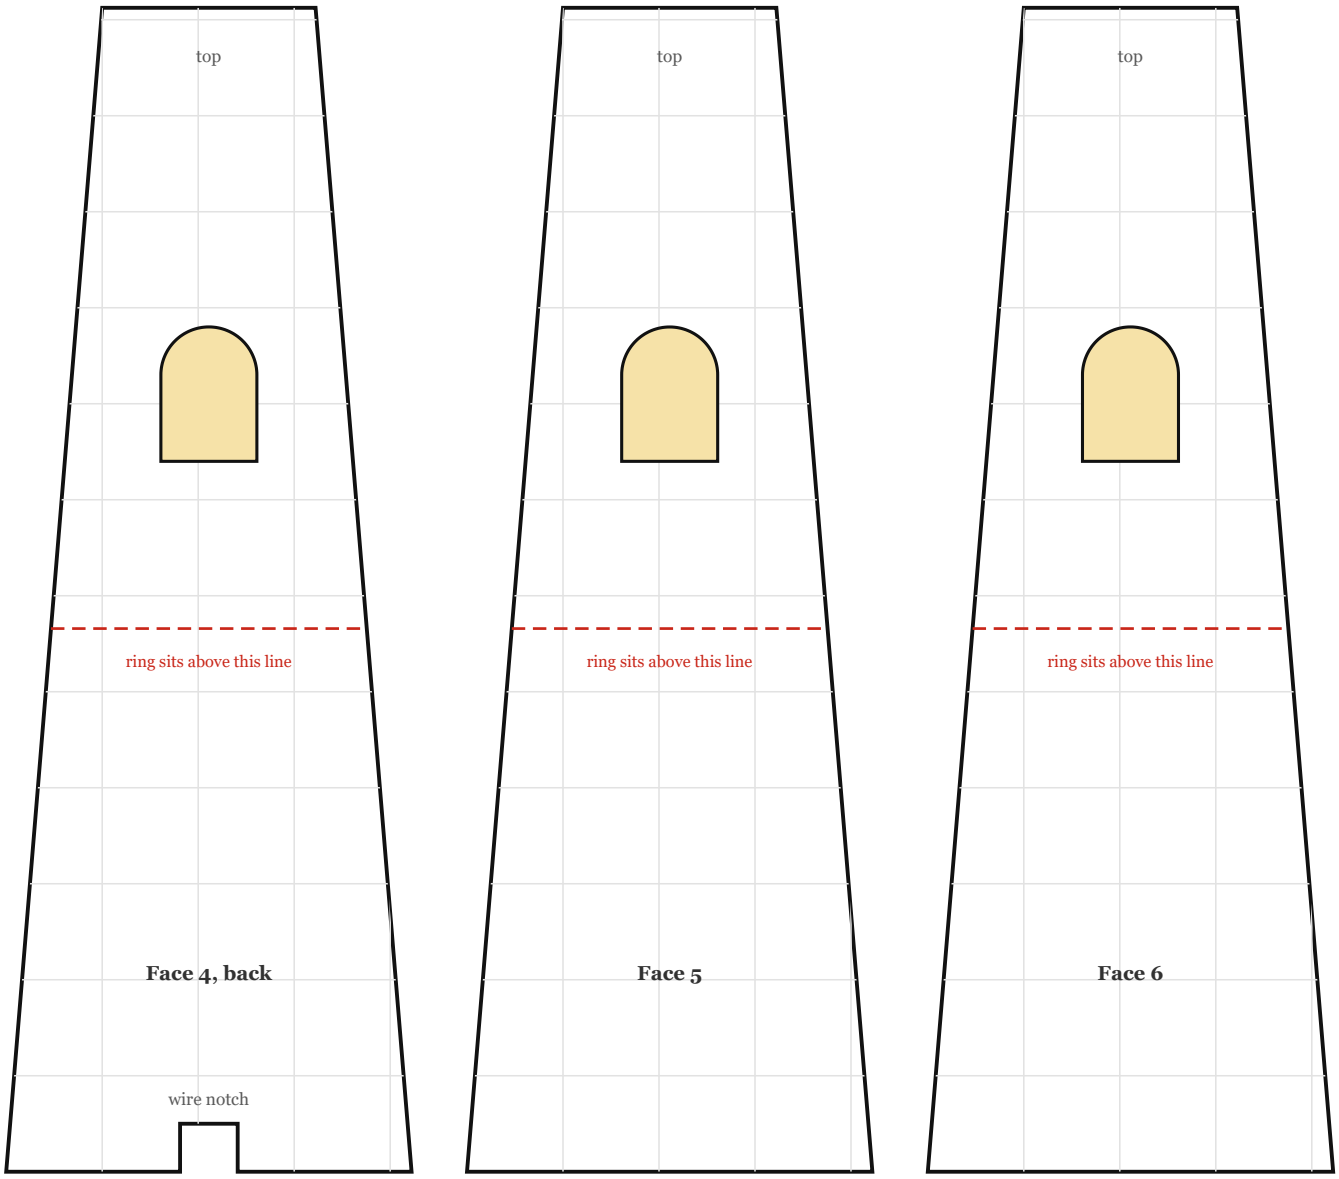

Solid line: cut. Gold window: cut out, then fill with crushed hard candy near the end of the bake.

Red dashes: guide only, do not cut (pipe the door and sail lattice along them).

measure it first

All four blades are the same. Lay them in a plus around the back discs, roots in, each sail panel on the same turning side, then cap them with the front disc.

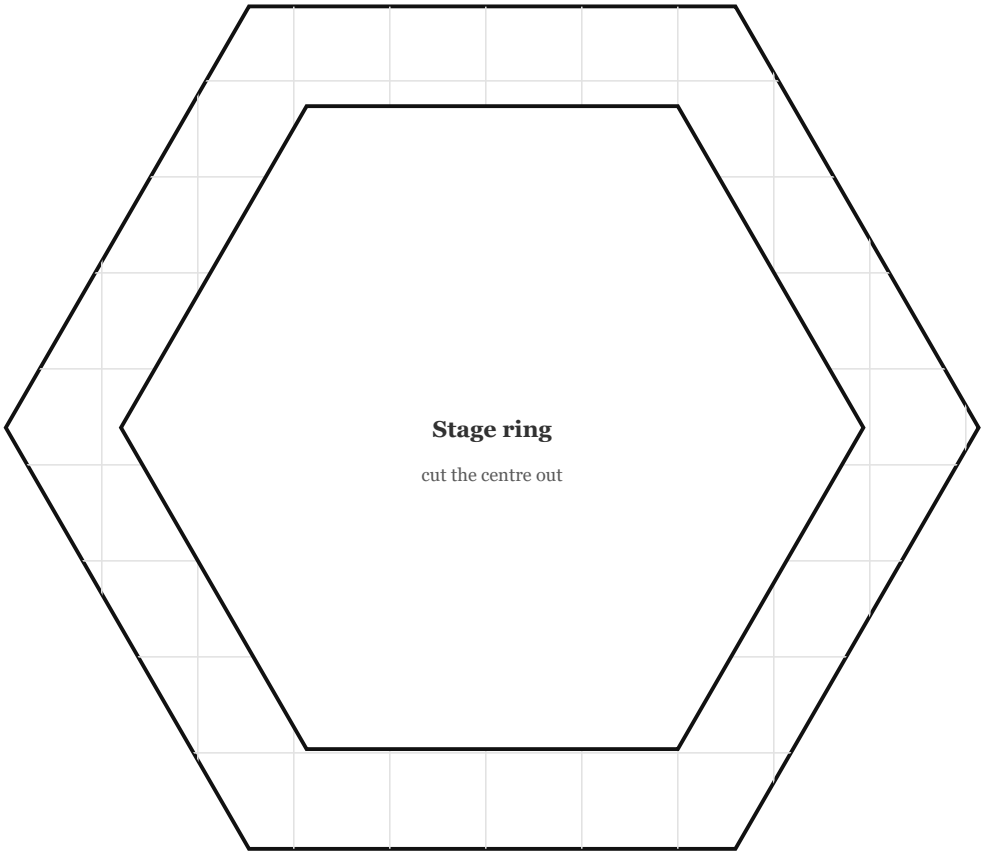

Solid line: cut. Gold window: cut out, then fill with crushed hard candy near the end of the bake.

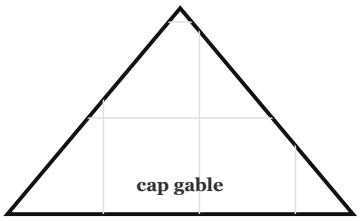

Red dashes: guide only, do not cut (pipe the door and sail lattice along them).

measure it first

The ring slides down over the tower top and stops where the taper meets its hole, at 2.8 in.

Bake it on parchment and leave it on the pan until it is fully cool.

Solid line: cut. Gold window: cut out, then fill with crushed hard candy near the end of the bake.

Red dashes: guide only, do not cut (pipe the door and sail lattice along them).
